

OREN SPECIALITIES

Company Profile

Chemistry, engineered for the field since 2001.

About Oren

Established in 2001, Oren Specialities is a specialized manufacturer and supplier of drilling, completion and production chemicals, serving the global oil and gas industry.

Our product range encompasses barite, bentonite, calcium carbonate, CMC, PAC, starch derivatives, lignite products, silicates, and a diverse spectrum of specialty water-based and oil-based production chemicals meticulously engineered for demanding field applications.

With a robust operational presence spanning the United Arab Emirates, Iraq, Egypt, and international markets, Oren Specialities delivers dependable chemical technologies that enhance drilling performance, optimize well operations, and mitigate operational risks.

Established 2001	Head office Jebel Ali, Dubai, UAE	Catalogue 165 products, 27 categories	Footprint UAE - Iraq - Egypt - international

Vision

Build a globally respected chemical solutions company, driven by a strong QHSE culture and operational excellence.

Mission

To continuously improve our products, services, and systems, while maintaining the highest safety, quality, and environmental standards across all business areas.

What sets Oren apart

Integrated manufacturing network

Production facilities across the UAE and Egypt supported by regional supply hubs in Iraq and Malaysia, ensuring consistent availability and reliable delivery.

Advanced research and formulation

A dedicated R&D and testing facility in the UAE focused on formulation development, performance testing, and continuous product innovation.

Global energy market presence

Headquartered in the UAE with operational reach across key energy-producing regions.

QHSE-driven operations

All operations follow strict Quality, Health, Safety, and Environmental standards to ensure responsible and sustainable industrial practices.

Quality

At OREN, quality is meticulously integrated into every product, encompassing raw material approval, in-process monitoring, and rigorous final testing. We maintain meticulous control over specifications, packaging, labeling, handling, and storage to guarantee consistent performance for our end users.

- API Spec Q1 & 13A | ISO 9001:2015 Certified
- Full-scale pilot plant for lab-to-plant scale-up
- Deviation documentation & CAPA management
- Quality audits: in-house, by certification bodies, and by customers.

Research and Development

Innovation is the driving force behind OREN's growth. Our centralized research and development team collaborates seamlessly with operations and global markets to design scalable and cost-effective drilling fluids and mud chemicals.

QHSE

At OREN, our comprehensive Quality Health and Safety (QHSE) framework fosters a culture of safe operations, environmental responsibility, and ongoing improvement throughout all our facilities.

Integrated Management System Policy

Quality, Environment, Occupational Health & Safety Management Systems.

Promotional activities on health & safety

Our safety team regularly implements awareness programs to reinforce safe work practices and foster continuous improvement in workplace conduct and performance.

In-house training

Safety training is regularly provided to both company and contract employees across all units, covering key safety topics and proper material handling practices.

Emergency Response Team

Each OREN site maintains a trained Emergency Response Team (ERT) to manage unit-level emergencies and provide prompt response support to neighboring industries.

Environmental care

Meeting and exceeding stringent global environmental standards remains a fundamental part of our operating philosophy.

Wastewater management

We are committed to safe and responsible operations that protect people, society, and the environment through careful and efficient management of resources.

Product ranges

Water-Based Drilling Fluids (90 products)
Oil-Based Drilling Fluids (48 products)
Completion & Packer Fluids (20 products)
Surfactants (7 products)
